Some additional options were shared about doing long exposures. ND filters can be used to soften water during the day, recommended settings/equipment were also discussed.

Eagles/Ags; photography displays set up on Thursday Feb 5. Sign up sheet was created (see attached) and most time spots are covered. Still need 2 ppl to cover 12:30pm-3:00pm and one person to help breakdown at 7:30. Need to confirm drop off and pick up of grids with Sandy.

Birds and Buckaroos need to be set with volunteers and flyers.

Gordon shared great stories and photos about his trip to Hudson Bay and Manitoba on a Polar Bear Expedition with Tundra Lodge Adventures in Oct 2025. Also went to Churchill on a prop plane. He also brought several of his travel photo books that he put together using Mixbook.

Dennis Cook also did a great short on composition. He will continue his short presentations each month on a new topic. Manipulate the viewer's eye to where you want them to look.
